OBJECTIVE

Computer Science student at the University of North Florida (graduating Dec 2026) seeking a software engineering internship. Experienced in full-stack development with React, Next.js, FastAPI, and Spring Boot. Open to remote, on-site, or hybrid roles for summer 2026, fall 2026, or spring 2027.

EDUCATION

University of North Florida | *B.S. in Computer Science*

Expected Dec 2026

Relevant Coursework: Data Structures, Algorithms, Systems Programming, Object-Oriented Design, REST APIs, Multithreading

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, SQL, Swift, C, Shell/Bash

Frameworks & Tools: React, Next.js, Node.js, FastAPI, Spring Boot, Tailwind CSS, Docker, Git, CI/CD

Databases & Cloud: PostgreSQL, MongoDB, Supabase, AWS, Vercel, Heroku, Linux/Unix

PROJECTS

AeroAtlas | *Personalized Travel Companion*

Node.js, TypeScript, Supabase, Vercel // **1st Place / 45 Teams, UNF Computing Symposium 2025**

- Built a full-stack travel app that pulls real-time data from 3 APIs (OpenWeather, OpenStreetMap, flight search) to generate personalized itineraries for users.
- Implemented user authentication and row-level security with Supabase and JWT tokens to keep user data private and secure.

AuraJewel | *CRM for Michesca Inc. (Live in Production)*

Next.js, Supabase, Tailwind CSS

- Built and deployed a custom CRM and ticketing system for a real jewelry business client. The app is currently live and used daily for operations.
- Designed automated workflows for tracking ticket status, cutting down manual admin work and speeding up the client's day-to-day process.

Stockseer | *Real-Time Stock Prediction Platform*

Python, FastAPI, scikit-learn, Next.js, Heroku

- Built a predictive ML model using linear regression to analyze live market data from the yfinance API, served through a FastAPI backend.
- Set up a CI/CD pipeline for automated deployment to Heroku and built a React dashboard for users to interact with predictions.

OpenClaw Arena | *Autonomous AI Agent Competition Platform*

TypeScript, Next.js, Supabase, Netlify

- Built a platform where autonomous AI agents compete in real-time, managing agent queues, competition windows, and concurrent backend operations.
- Added a community voting and verification system with a live public leaderboard that updates in real time.

SaaS Product (In Development) | *Full-stack SaaS application, currently building toward launch.*

WORK EXPERIENCE

Technical Specialist | *Apple Inc.*

Nov 2023 - Present

- Diagnosed complex hardware and software issues across Apple's product line, consistently ranking #1 on the store's performance scoreboard with a perfect NPS score.
- Collaborated with Apple engineering teams to escalate and resolve critical technical issues, bridging communication between customers and backend teams.
- Translated technical problems into clear, non-technical language for customers, building strong communication skills used in cross-team environments.

LANGUAGES

English, Spanish
